

Three flagship cases arranged as a single executive proof system

This portfolio is designed as a proof system, not as a library of unrelated samples. It is organized around three flagship cases. The first case proves operational execution under real constraints in a regulated environment. The second and third cases form a commercial-strategy chain: market structure, benchmark logic, and pricing architecture. Together they show how Santiago moves from messy inputs to structured judgment, and from structured judgment to decision-ready output.

Portfolio Thesis

The package is designed to show execution under constraints and commercial judgment in sequence.

Key points

- Santiago's value is clearest when the work requires analytical judgment, written clarity, and disciplined structure under ambigui...
- The flagship portfolio therefore focuses on two proof pillars: operational intelligence and commercial intelligence. That is the...

Guide role

This portfolio is designed as a proof system, not as a library of unrelated samples. It is organized around three flagship cases. The first case proves operational execution under...

The three hero cases are meant to be read together

Each case stands alone, but the full package gets stronger when the operational and commercial logic are read as a chain.

01 | Operational Intelligence

A regulated financial-services environment was processing more than 650 audit requirements annually through a manual classification and routing workflow. The legacy process consumed senior staff time, introduc...

02 | Commercial Intelligence

This case merges market research and competitive benchmarking into one commercial-intelligence asset. The category examined is AI productivity software. The analysis identifies three market archetypes, maps ho...

03 | Pricing and Monetization

This pricing case translates the commercial logic from the AI productivity market analysis into a monetization design. The problem is a common one: a workflow product with one broad offer is trying to serve mu...

The Two Proof Pillars

The guide explains why these cases were selected and what each one proves.

Pillar	Case	Business question	What it proves
Operational intelligence	01 AI Workflow	Can Santiago design and improve real workflows under control constraints?	Execution, control design, measured impact
Commercial intelligence	02 Commercial Intelligence	Can Santiago convert market noise into a strategy thesis and benchmark logic?	Research depth, competitor framing, positioning judgment
Commercial intelligence	03 Pricing Strategy	Can Santiago translate evidence into monetization design and rollout logic?	Commercial reasoning, packaging, validation design

Case 01 stands on its own because it is grounded in anonymized real operating evidence.

Read the package as one proof system, not as disconnected samples

Takeaways

- For recruiters: read this guide, then Case 01, then whichever commercial case matches the role.
- For founders or clients: start with Case 01 for operational proof, then Case 02 for commercial framing.
- For recruiter review or project discussion, email santiago.garces.blevine@gmail.com. Include the role or problem, timeline, and expected deliverable format.
