| <b>97%+</b><br>AI workflow assignment accuracy | <b>24+ hrs</b><br>manual work removed weekly                     |
| <b>657+</b><br>audit requirements managed      | <b>4</b><br>jurisdictions covered in fintech regulation research |

### Executive Summary

This dossier organizes Santiago Garces Chavarria's portfolio into a clear proof system for recruiters, strategy teams, founders, and direct clients. The portfolio is built around six core assets: operational intelligence, market research, competitive benchmarking, pricing strategy, regulatory analysis, and executive writing. Each asset is labeled by work type and designed to demonstrate one concrete capability rather than make generic claims.

# Positioning

Santiago is an analytical operator who turns fragmented market, regulatory, financial, and operational information into clear recommendations, structured deliverables, and decision-ready outputs.

His edge sits at the intersection of regulated financial-services operations, structured research, and AI-enabled workflow execution. That combination allows him to support work that is simultaneously analytical, commercially useful, and execution-aware.

## What This Portfolio Proves

- Clear English writing in memo, report, brief, and slide-deck formats.
- Structured thinking under uncertainty across research, strategy, and regulated-market topics.
- Commercial reasoning in pricing, positioning, and competitive analysis work.
- AI-enabled execution linked to measurable operational outcomes, not superficial experimentation.
- Ability to operate in regulated or high-stakes environments with disciplined communication.

## Role-Fit Matrix

Primary role categories

| Role category                    | Fit       | Portfolio proof                         |
|----------------------------------|-----------|-----------------------------------------|
| Market Research Analyst          | High      | Assets 02, 03, 05                       |
| Competitive Intelligence Analyst | High      | Assets 02 and 03                        |
| Strategy Analyst                 | High      | Assets 03 and 04                        |
| Pricing Strategy Research        | High      | Asset 04                                |
| Regulated-market Analysis        | High      | Asset 05                                |
| AI Workflow Projects             | High      | Asset 01                                |
| Financial Research Support       | Adjacency | Assets 04 and 05                        |
| Deal / diligence support         | Adjacency | Asset 03 style of structured comparison |

## Portfolio Map

Core assets

## Reading Paths by Audience

Suggested reading sequences

| Audience      | Start with       | Then review      | Question answered                                        |
|---------------|------------------|------------------|----------------------------------------------------------|
| Recruiter     | This dossier     | Assets 01 and 02 | Can this person write, think, and deliver?               |
| Boutique firm | Assets 03 and 04 | Asset 05         | Can this person support strategy-facing client work?     |
| Direct client | Asset 01         | Assets 03 and 04 | Can this person produce structured, decision-ready work? |

## Credibility Labels

Every asset is labeled by work type so the portfolio does not blur real, anonymized, thesis-adapted, and self-initiated work.

- Anonymized: based on real work, with sensitive context removed.
- Self-initiated: original sample work built from public information.
- Thesis-adapted: research translated from academic work into a commercial brief.

## Working Model

- Remote-first and async-friendly working style.
- Written deliverables as the default communication format.
- Strong fit for research-heavy, ambiguity-heavy, and strategy-adjacent work.
- Best suited to small and medium-sized teams that value autonomy and rigor.
